

A Structured Report on Typst Integration

Contents

1. Introduction	2
2. Architecture	2
2.1. Data Flow	2
3. Security Considerations	2
4. References	2

1. Introduction

This document demonstrates the `rfc-typst` package. It provides a clean, RFC-compliant layout with automatic headers, footers, and structured headings.

2. Architecture

The system follows a modular design. Below is a simplified component diagram:

2.1. Data Flow

1. Client sends request
2. Proxy validates & forwards
3. Server processes & responds

3. Security Considerations

All communication is encrypted using TLS 1.3. Refer to RFC 8446 for details.

4. References

RFC 8446
